MENNA GALAL MOHAMED

LARAVEL / PHP FULL STACK DEVELOPER

Egypt | +20 1555934133 | mennagalal0193@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

PHP / Laravel Full Stack Developer with 3+ years of experience building and maintaining commercial web applications, particularly E-commerce platforms and business systems. Contributed to 20+ projects across company and freelance work, including 15+ commercial projects at Bluezone Web Company.Experienced in translating business requirements into well-structured application logic, developing RESTful APIs, designing database relationships, integrating payment gateways, and building frontend functionality.Strong focus on clean code, software design, database efficiency, application performance, security, and maintainability. Comfortable taking ownership of features, solving technical challenges, and working across the development lifecycle, from implementation to deployment and production support.

TECHNICAL SKILLS

Backend: PHP, Laravel, MVC, RESTful APIs, Authentication & Authorization, Role-Based Access Control, Business Logic

Database: MySQL, Eloquent ORM, Database Relationships, Schema Design, Query Optimization, Indexing

Performance: Redis, Caching, Queues, Background Processing

Integrations: MyFatoorah, Stripe, MetalpriceAPI, Twilio, Mailgun, Google Login, Apple Login, Facebook Login, Web/API Integrations

Frontend: HTML, CSS, JavaScript, jQuery, Bootstrap

Tools & Workflow: Git, GitHub, Branching, Pull Requests, Merge Conflict Resolution, Composer, SSH, Trello

AI-Assisted Development: AI coding assistants for code analysis, debugging, refactoring, test generation, documentation, and development workflow support. Review and validate AI-generated code before integration.

Additional: Multi-language Applications, Push Notifications, Multi-authentication Guards, Deployment, Production Troubleshooting

PROFESSIONAL EXPERIENCE

Full Stack Developer | Bluezone Web Company • ***Apr 2023 – Oct 2026***

- Contributed to 15+ commercial projects, including e-commerce platforms and business applications; several were delivered end-to-end with an admin dashboard, customer-facing website, and backend APIs.
- Developed and maintained Laravel backend functionality, RESTful APIs, authentication flows, authorization rules, and role-based access control.
- Implemented business logic and data workflows, designing database schemas and relationships on selected projects and working with existing database designs where required.
- Integrated payment gateways and third-party services, including MyFatoorah, Stripe, MetalpriceAPI, Twilio, Mailgun, and Google, Apple, and Facebook login.
- Implemented multi-language support, push notifications, and multiple authentication guards for applications with different user roles.
- Applied queues, Redis, caching, database indexing, and query optimization where appropriate to support application performance and background processing.
- Enhanced existing applications by adding features, modifying existing functionality, fixing bugs, and troubleshooting issues reported from production environments.

- Handled deployment, debugging, maintenance, and feature delivery with independent ownership across backend, frontend, and production tasks.

Freelance Full Stack Developer • ***Dec 2022 – 2023***

- Developed and delivered web applications for local and international clients across different business domains.
- Built REST APIs and authentication flows using Laravel Breeze, Sanctum, and JWT, according to project requirements.
- Created responsive frontend components using HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Customized Laravel packages and implemented tailored functionality to meet client requirements.

SELECTED PROJECTS

E-commerce & Business Applications

- Worked on commercial e-commerce and business applications involving backend features, APIs, payment integrations, multilingual functionality, authentication, performance improvements, and production maintenance.

GreatRead Website

- Developed a Laravel and MySQL book-management platform with admin management for books, categories, featured books, and quotes displayed dynamically on the frontend; used Laravel Breeze and the Cork dashboard.

HUB49 – Branding Website

- Built a web platform for a Dubai-based branding company with a planning and content calendar; integrated Stripe payments and email services using Laravel Mailable and Mailtrap.

ElmalahTour – Tourism Management Platform

- Developed an admin dashboard and customer-facing website for a French tourism company, implementing authentication and role/permission management with Spatie, plus email functionality.

EMG-Controlled Robotic Arm | Graduation Project

- Built a machine-learning/deep-learning classification workflow for EMG signals using TensorFlow and Scikit-Learn, achieving 98% classification accuracy across 8 movement classes; collected signals using a MYO Armband and built a Python interface with Tkinter and PyGame.
- The project and dataset were documented in an IEEE research paper: https://ieeexplore.ieee.org/document/11137016/

EDUCATION

Bachelor of Computer Science | Ain Shams University, 2022

- Graduation project: EMG-Controlled Robotic Arm (Grade: Excellent).
